

Peterhead Baptist Church

Audio Visual services for visitors

Latest update 4th October 2026.

This document is intended for visiting speakers or those taking part in a Sunday service at PBC.

We are pleased to welcome you to Peterhead Baptist Church. To assist you in your ministry we have an extended team involved in delivering technical services.

Audio Systems

You will be provided with a microphone which is usually head-worn, though we can provide other types if deemed to be more suitable. Our sound team's responsibility is to ensure you are heard clearly by those in the sanctuary through the PA system. We also have a hearing loop installed; relay the service to our crèche and hub as well as livestream our services via our youtube channel. In order that all these aspects are covered it is necessary for you to use a microphone.

Visual Systems

Peterhead Baptist is equipped with video facilities in several of our meeting areas. In the main Sanctuary there is also a large screen mounted at the rear of the sanctuary for the speaker's reference (mirroring what is being projected on the front wall). One of our AV team will operate this equipment using "Presenter": A software package which projects song words as well as other media.

In the sanctuary there is generally no facility for connection of your own laptop. Should you wish to use PowerPoint, please provide this PowerPoint by email to visionteam@peterheadbaptist.org by Friday evening. A remote control is available if you wish to control your own slides. If you would rather our team progressed the slides for you, a clear outline of your presentation would be very much appreciated.

Playback from DVD discs are not supported.

Digital files are supported in the following file formats: M4v, MP4, AVI, WMV. If you wish to use video, we request that any video is sent to visionteam@peterheadbaptist.org by **Friday evening** using www.wetransfer.com

Note: we will not play videos directly from the internet, they must be downloaded and provided as a file.

Projectors in other areas are provided with HDMI cables for connection of your laptop. Cables for sound are also available.

If you are also providing the hymns for the service, please pass this to your contact or the secretary, so that the order of service can be entered into our Service planning system before Wednesday evening.
